All such parties expressly disclaim any and all liability for, or based on or relating to any such information contained in the valuation.

5. VALUATION APPROACH

- 5.1. For the purpose of valuation for slump exchange, generally the following approaches are adopted:

- (a) the "Underlying Asset" approach
- (b) the "Income" approach; and
- (c) the "Market" approach

- 5.2. In the present case, net worth of both TLL and the T&D Undertaking is negative, therefore the Underlying Asset approach is not adopted for the present valuation exercise.

- 5.3. The shares of TLL as well as the T&D Undertaking of GIL are not listed on any stock exchange. Hence, market approach has not been adopted.

5.4. INCOME APPROACH

Under the "Income" approach, shares of TLL and the T&D Undertaking of GIL have been valued using Discounted Cash Flow (DCF) method.

- 5.4.1. Under the DCF method the projected free cash flows from business operations after considering fund requirements for projected capital expenditure and incremental working capital are discounted at the Weighted Average Cost of Capital (WACC). The sum of the discounted value of such free cash flows and discounted value of perpetuity is the value of the business.

- 5.4.2. The free cash flows represent the cash available for distribution to both the owners and the creditors of the business. The free cash flows are determined by adding back to profit before tax, depreciation and amortizations (non-cash charge). The cash flow is adjusted for

outflows on account of capital expenditure, tax and change in working capital requirements.

- 5.4.3. WACC is considered as the most appropriate discount rate in the DCF Method, since it reflects both the business and the financial risk of the company. In other words, WACC is the weighted average of the company's cost of equity and debt. Considering an appropriate mix between debt and equity for the company/undertaking, we have arrived at the WACC to be used for discounting the Free Cash Flows.
- 5.4.4. Value for equity shareholders is arrived at after making adjustment for loan funds and cash & cash equivalents.
- 5.4.5. The equity value so arrived at is divided by the diluted number of equity shares (considering capital reduction of TLL) to arrive at the value per share.

6. RECOMMENDATION

- 6.1. The fair basis of slump exchange of the T&D Undertaking of GIL into TLL would have to be determined after taking into consideration all the factors and methodologies mentioned hereinabove. As mentioned above we have considered the 'income' approach for arriving at the value of the shares of TLL and the value of the T&D Undertaking.
- 6.2. In the ultimate analysis, valuation will have to involve the exercise of judicious discretion and judgment taking into account all the relevant factors. There will always be several factors, e.g. present and prospective competition, yield on comparable securities and market sentiments, etc. which are not evident from the face of the balance sheets but which will strongly influence the worth of a share. This concept is also recognized in judicial decisions. For example, Viscount Simon Bd in Gold Coast Selection Trust Ltd. vs. Humphrey reported in 30 TC 209 (House of Lords) and quoted with approval by the Supreme Court of India in the case reported in 176 ITR 417 as under:

'If the asset takes the form of fully paid shares, the valuation will take into account not only the terms of the agreement but a number of other factors, such as prospective yield, marketability, the general outlook for the type of business of the company which has allotted the shares, the result of a contemporary prospectus offering similar shares for subscription, the capital position of the company, so forth. There may also be an element of value in the fact that the holding of the shares gives control of the company. If the asset is

difficult to value, but is nonetheless of a money value, the best valuation possible must be made. Valuation is an art, not an exact science. Mathematical certainty is not demanded, nor indeed is it possible.'

- 6.3. In light of the above and on consideration of all the relevant factors and circumstances as discussed and outlined hereinabove in this report, in our opinion, fair equity consideration for transfer of T&D Undertaking works out to 7,25,000 equity shares of INR 10 each of TLL.

Thank you,
Yours faithfully,
